

*It would be nice if all of the data which sociologists require could be enumerated because then we could run them through IBM machines and draw charts as the economists do. However, not everything that can be counted counts, and not everything that counts can be counted.*

– William Bruce Cameron (1963) *Informal Sociology: A Casual Introduction to Sociological Thinking*

## Introduction to Qualitative Research in the Social Sciences

with Dr. Heather Adams

### Overview of the Course

This course will provide an overview of key areas of qualitative research as it is commonly employed in the social sciences. The course format will interweave professor led discussions, student construction a private wiki site and generating experiential knowledge through a class research project. Instructor led topics will include an introduction to qualitative research, ethics, epistemologies, methodological rigor, participant action research, representation of findings, and publishing research. Student wikispaces [ I use Wikispaces – a site free for educational purposes] will be constructed in groups, with each group covering one of the following five topics: interviewing, artifact collection, participant observation, or thematic analysis. The second half of the course will focus on experiential learning, as you will apply what you have learned textually to designing and producing a class research project. Our project location this year is the [unspecified at this time – previous course focused on the BSU Multicultural Center]. At the conclusion of the course you will be familiar with key methods, common terminology and key areas of methodological discussion.

We will devote half of the last two weeks to in-class sessions where you will apply what you have learned in the course through writing up your research proposal or draft of results. I will also host a session during finals week if students are interested. This will be a purely collaborative process, where we will all work together to improve the quality of each other's work. These assignments will not be graded.

### Required Readings

All Students:

- Crotty, M. (1998). *The Foundations of Social Research*. Thousand Oaks, CA: Sage
- Kvale, S. (1996). *InterViews: An introduction to qualitative research interviewing*. Thousand Oaks, CA: Sage
- Palmer, D.D. (1997). *Structuralism and Poststructuralism for Beginners*. NY, NY: Writers & Readers
- All other required readings are posted on Blackboard

Graduate Students Only:

- Cresell, J.W. (2002). *Research Design: Qualitative, Quantitative, and Mixed Methods Approaches (2nd Edition)*. Thousand Oaks, CA: Sage.

**Scheduled Topics, Assignments and Class Activities**
